DOCKET CONTROL

Dear members of the Arizona Corporation Commission:

As we approach the summer months and think about the heat and our electricity bills, I am concerned the current economic situation will hit me even harder this season. Please provide some relief for the short and longer terms by increasing energy efficiency requirements as part of the APS rate case and as part of the commission workshops on energy efficiency to at least 20% by 2010. I am willing to increase my electricity rates in order for this to happen as I realize my monthly electric bills will decrease through strong energy efficiency programs.

Energy efficiency has tangible advantages such as the ability to save consumer's money right away. Energy efficiency programs such as weatherization, appliances, lighting, ... , helps businesses and individual consumers. Education on these programs coupled with technical assistance and rebates is a win-win-win for customers.

I appreciate the work that the Commission has done to increase renewable energy, such as solar and wind, and while you continue forward that direction, please also include meaningful efforts to improve energy efficiency programs at APS and the other utilities under your jurisdiction.

With Regards,

Gillian Ertin

Docket Numbers E-01345A-08-0172, E-00000J-08-0314
and G-00000C-08-0314

Dear Commissioners,

I am writing as a concerned citizen of Tucson in support of increasing energy efficiency programs by 20% by the year 2020 in Arizona as part of the Commission workshops and the APS rate case. As you know, energy efficiency is the quickest, cheapest, and cleanest way for our state to meet its growing energy needs.

I recognize that energy efficiency programs require some up front funding that can result in slightly higher electricity rates. I also know that investing in energy efficiency measures such as lighting and weatherization will help to lower overall electric bills. I am willing to pay higher rates to fund programs that will help to lower my energy use and electric bills.

Thank you for your work on this important issue.

Sincerely,
Lisa Wenster

G-00000C-08-0314

Dear Commissioners,

I am writing as a Tucson concerned citizen in support of an increase of energy efficiency programs to at least 20% by 2020 in Arizona as part of Commission workshops and the APS rate case. Energy efficiency is the quickest, cheapest, and cleanest way for our state to meet its growing energy demands.

I recognize that energy efficiency programs require some up front funding that can result in slightly higher electricity rates. I also know that by investing in energy efficiency measures, such as lighting or weatherization, will help to lower electric bills overall. I am willing to pay higher rates to fund programs that will help to lower my energy use and electric bills in the long run.

Thank you for your work on this important issue.

Sincerely,

Ashley Francis

Dear Commissioners,

I am writing you as both a concerned citizen and a long time APS customer. My main point of writing this letter is in support of increasing energy efficiency programs by 20% by 2020 in Arizona. Energy efficiency is the quickest, cleanest, & cheapest way for our state to meet the growing environmental needs.

Sincerely,

Trevor Lightfoot

Dear Commissioners,

I am writing in support of increasing energy efficiency programs to at least 20% by 2020 in Arizona as part of the Commission workshops and the APS rate case. Energy efficiency is a very cheap and clean way for our state to meet its growing energy needs.

Thank you for all the effort you spend on this important issue

Sincerely

and G-00000C-08-0314

Dear Commissioners,

I am writing as a concerned citizen who supports increasing energy efficiency programs ~~to~~ to at least 20% by 2020. I believe energy efficiency is the quickest, cheapest, and cleanest way for our state to meet its growing energy needs.

I understand that energy efficiency programs require more funding that can result in slightly higher electricity rates. I am positive that investing in energy efficiency measures such as lighting and weatherization will help to lower overall electric bills. I am willing to pay higher rates to fund programs that will help to lower my energy use & electric bills.

Thank you for your work on this important issue.

Sincerely,

Docket Numbers E-01345 A-08-0172, E-00000J-08-0314
and G-00000C-08-0314

Dear Commissioners,

I am writing to you to lend my support to increasing energy efficiency programs to at least 20% by 2020 in Arizona as part of the Commission workshops and the APS rate case. I am earnestly and fervently a believer that energy efficiency would solve our state's energy issues, especially considering the rate of population growth in Arizona. It would be the quickest way, the cheapest way, and most importantly the cleanest way to do this.

It is true that energy efficiency programs require higher upfront costs, yet they will lower overall utility cost in the long run. Lighting and weatherization (especially!) are important and costly in terms of monthly electricity bills in Arizona. I am willing to pay higher rates to fund programs that will help to lower my energy use and electric bills.

Thank you for your work on this important issue.

Best Regards,

Cate Clifton
